- [System Requirements and Compatibility](#)

## BarTender Editions Summary

BarTender is available in four editions that address a wide range of features and user requirements. This general overview is followed by a more detailed [Features and Editions Comparison Chart](#).

**Printer Licensing:** Both "Automation" editions allow unlimited network users. Licensing is based on the maximum number of printers used by BarTender on the network.

### Enterprise Automation

Our most powerful edition. Includes all of the [label design](#), [printing](#), [software integration](#), and [data sourcing](#) features of the Automation edition, plus advanced server functions for [centralized printing](#), [security](#) and [administration](#). Includes BarTender [Web Print Server](#) to print labels from any browser. Contains our most [advanced integration](#) features, including TCP/IP triggers, [SAP AII](#), [Oracle XML](#), XML transforms, and XML scripting. Includes full functionality for all of the [Companion Applications](#), including [Librarian](#) and logging to centralized databases. [Tracks](#) printer parts inventory and in-printer media usage.

### Automation

**Includes** - All of BarTender's most powerful [label design](#) features. Numerous [software integration](#) tools, such as [ActiveX Automation](#), enterprise messaging and Seagull's [Commander](#) utility for cross-platform integration. All the [data sourcing](#) of Professional, plus support for [SAP IDocs](#). Includes all of the [Companion Applications](#) except for [Librarian](#), but [not all of the features](#). Logging to local databases only. Includes all available [RFID design and encoding capabilities](#).

**Omits** - Does not offer the enhanced server functions, [advanced integration](#) (such as XML and SAP AII), and web printing capabilities of
