

## Accessories for the Dolphin 7900 Series

### Mag Stripe Reader

The Mag Stripe Reader (MSR) attaches to the Dolphin 7900 terminal and can be used to read magnetic stripe information encoded on credit cards, driver's licenses, and personal information cards.

The Dolphin 7900 with MSR is ideal for processing credit card payments in route accounting and delivery applications, validating a person's identity information on a driver's license or personal information card, and performing on-the-floor sale transactions and credit authorizations at busy retail establishments.

Part #: 7900-MSR

### Mobile Mount

The Mobile Mount is a durable, low-cost cradle accessory for securely mounting the Dolphin 7900 terminal inside a vehicle.

The adjustable RAM bracket provides a wide range of ergonomic mounting positions and the Mobile Mount housing is compatible with the Dolphin Mobile Charger for charging the terminal.

The Mobile Mount can be used as a low-cost alternative to the Dolphin Mobile Base when integrated serial communications are not required. The entire kit includes the cradle for the terminal and an adjustable RAM vehicle mounting bracket.

Part #: 7900-MM

### Mobile Charger

The Mobile Charger is a charging cable that connects the terminal directly to a 12 or 24 Volt DC power source, such as a cigarette lighter port inside a vehicle, which eliminates the need for a cradle to charge.

The Mobile Charger powers the terminal and charges its main battery in less than four hours, which makes the Mobile Charge a fast, low-cost charging solution for in-transit mobile applications.

Part #: 20000523

# Dolphin 7900 Accessories

## Charging/Communication Cable Kits

Dolphin charging/communication cable kits are an all-in-one solution for mobile applications. Each cable kit powers the terminal, charges its main battery, and communicates with host or peripheral devices without the need for a cradle.

Cable kits can support RS-232 or USB communications and are available with U.K. or European power cords (USB, U.S. shown).

Part #:  
9500-RS232-1  
9500-USB-1

## Holsters

Holsters provide convenient storage for terminals and protect them from damage in mobile environments. The front pocket holds an extra battery, the side pocket holds an extra stylus, and the belt loop secures the holster to a belt.

Part #: 7900 Holster

## Protective Enclosures

Protective enclosures help seal and protect terminals from damage while providing full access to all terminal parts and features. The swivel clip on the back enables you to secure the enclosure to a belt.

Two styles of enclosures are available - one with clear plastic covering the keyboard and one without.

Part #: 7900 Cover  
(with plastic cover)

Part #: 7900 Cover/2  
(without plastic cover)
