Track'em™

Inventory and Asset Barcode Tracking System

From RVB Systems Group

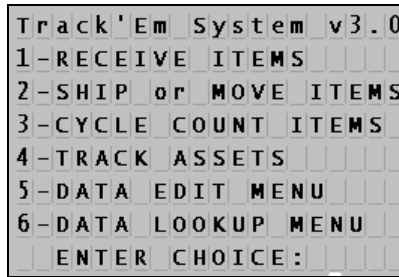

Track'Em™ Standard Package includes Rugged Portable Scanner

Track'em™

RVB Systems Group's **Track'Em™** is a Microsoft Access database system that provides all of the tools necessary to manage your company's inventory and/or assets. It allows you to scan barcodes at any material movement transaction, and print reports showing current inventory levels and locations.

You can also use **Track'Em™** to track assets by location and / or any given status (such as person, event, category, etc).

Portable scanner main screen

Capture information with the portable scanner, upload it to your PC by clicking a single button in **Track'Em™**, and the database is automatically updated with all the data you captured.

Track both ASSETS (any uniquely numbered thing such as documents, computer equipment, tools, etc) and ITEMS (things that have the same barcode number such as 2 boxes of copy paper) with **Track'Em™**. No additional software modules to purchase.

Easy installation on your desktop or your network!
No additional license fee for network version!
Unlimited users – one low price.

Ready-to-use reports include on-hand inventory reports, next scheduled maintenance reports, re-order reports, material movement and usage reports, etc.

Easily track KITS and ASSEMBLIES. Automatically deletes components and sub-assemblies from inventory whenever you decide.

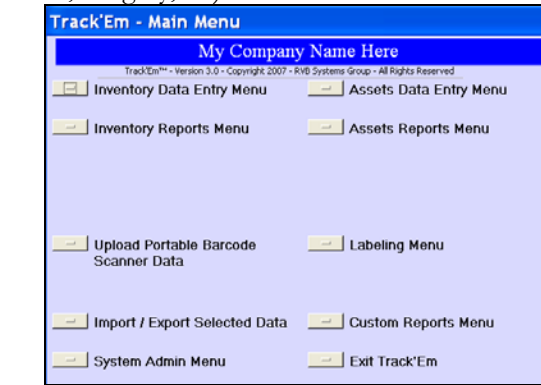

Product Entry Screen – Additional fields on advanced screen

Label Printing Software

Dozens of reports are included. Easily customize reports using the powerful features of Microsoft Access!!!

- You can download descriptions to the portable scanner so that the operator knows exactly what is being scanned. You can enter descriptions of new items and assets right on the portable scanner.
- Easily import/export EXCEL data into **Track'Em™**, or add/edit data via the PC screens.
- Optional password on scanner and PC.
- Simple one button method of importing data from portable barcode scanner.
- Historical reports for all transactions by date range, location, item, or category.
- Detailed user's manual illustrates all PC and portable scanner screens.
- Runs from local PC or over network.
- Lite and Standard versions include 500 sequentially numbered barcode labels.
- 30-day money back guarantee and 30-day free software support. Extended support plans available.

Track'Em Main Menu

Unlike some other inventory systems, **Track'Em™** is ready to use when it is installed. Anyone can easily customize **Track'Em™**, such as the following:

- Enable / Disable password security on entire system as well as specific menu options
- Add / Delete / Change menu descriptions
- Add / Delete / Change users
- Customize report and menu titles with company name and/or message.
- Import / Export data to Excel or other databases
- Customize database field descriptions and / or remove un-used data elements
- Easily download asset, item and location descriptions to portable laser scanner.
- Create your own custom reports and queries using MS Access
