CorpSystem™ ZIPSales Database and ZIPSales Lookup for Restaurants

Complete coverage of sales tax rates and taxability rules for the restaurant industry

AUTOMATE YOUR RESTAURANT TAXATION

Cut your audit exposure with accurate and complete sales tax decisions and rates specifically researched for the restaurant industry. CorpSystem ZIPSales solutions put the unique sales tax rates and taxability rules for the restaurant industry into a comprehensive database and lookup tool. Your tax department will easily and accurately update and monitor your point of sale (POS) system with monthly sales tax updates. Coverage includes more than 10,000 taxing jurisdictions in the U.S., its territories, and Canada. CorpSystem ZIPSales Database and ZIPSales Lookup for Restaurants offer:

- **Integration** — Provided in a flat ASCII file (comma delimited or fixed length), sales tax rates and taxability rules can be easily loaded into your ERP or POS system, saving you valuable time during the monthly update process. You can integrate the data right into your work processes with a minimum of programming.
- **Ease of Use** — With this database at your fingertips, you no longer need to track or manually input taxability rules or rates into your system. By spending less time researching sales tax rates and rules, you'll have more time for strategic planning and for growing your business.
- **Flexibility and Accuracy** — The data is mapped using multiple location criteria: ZIP code, ZIP + 4, FIPS geocode and state, county and city name, so jurisdictional determination is faster and easier, even if a ZIP code crosses city limits. And since the database is available in state subsets or for the entire country, you purchase and store only the data you need.

- **Trustworthiness** — Backed by over 90 years of CCH tax and legal research, CorpSystem ZIPSales solutions for restaurants represents the industry standard for sales and use tax data. With tax information so accurate that even the IRS uses it, your company can expect reduced penalties and fines when audited.

SIMPLIFY YOUR RESEARCH

CorpSystem ZIPSales Lookup for Restaurants is a standalone program that ensures you have the latest sales tax rates and rules at your fingertips for every ZIP code, city, county and state in the U.S., its territories and Canada. Specific location information is retained for streamlined monthly tracking, and you can even view and print a monthly list of changed rates and taxability rules. In seconds your tax department will be able to determine whether or not a food or beverage item is taxable and at what rate — no matter where you do business.

COMPREHENSIVE COVERAGE OF THE RESTAURANT INDUSTRY

Monthly updates are quickly and easily downloaded via the Internet, providing you with changes to all taxability rules and rates unique to the restaurant industry including:
